

Activity Idea

Egg Carton Puppet

Recommended for Ages 8 - 12

You will need the following materials:

- Egg carton (Parents may need to help their child cut the egg carton)
- Crayons, markers, color pencils
- Scissors
- Glue or tape
- Sock or popsicle stick

Instructions:

1. Use the pattern on the egg carton to help you create the face for your puppet.
2. Then with a pencil or marker trace the face of the puppet on the egg carton.
3. With scissors, cut the egg carton along the traced lines.
4. Once you have cut the puppet, decorate it with markers or crayons. You can embellish the puppet with other recycle supplies. For example, the feathers on the ostrich puppet were made from a recycled cardboard tube. Be creative and check around your house for other recycle supplies for the puppet.
5. Glue your puppet to a popsicle stick or sock.
