THE ART OF KUMIHIMO MAKE YOUR OWN FRIENDSHIP BRACELET

Recommended for Ages 12-18

Kumihimo is the Japanese word for “gathered thread”. The verb *kumu* means to braid and the noun *himo* is a cord. With this program, you will be able to make your own friendship bracelet using the kumihimo technique.

What is Kumihimo?

Kumihimo is a traditional Japanese weaving technique used in making long strands of braided material, usually silk. The braided strands are made by looping the thread in a repetitive way. In the beginning, the weaving was done using the artist’s fingers but over time, tools were used. One of these tools is called a marudai (round stand); a traditional tall round tool for braiding. Today, smaller portable tools can be used like a kumihimo disk or square.

Kumihimo has been used throughout history in a variety of ways. During the Samurai period, some armor required silk cords laced together in the metal work. Also, traditional garbs like a kimono used a braided cord of kumihimo called an obijime. Today, kumihimo is used by designers to highlight the beauty of silk cords in different ways like beaded jewelry or as bracelets.

There are many types of kumihimo styles. Here are a few:

- Hira Kara Gumi: 8-element flat braid
- Edo Yatsu Gumi: one of the most familiar 8-element round braid, often plaited in a solid color to produce cords suitable for jewelry designers
- Kongō Gumi: 16-element braid, broken into 8 pairs, weaved on a disk. It is usually made with four colors to create spiral stripes. This is the one you will learn with this program.

Activity: Kumihimo Friendship Bracelets

Materials

- Cardboard or foamboard
- Yarn or string
- Pen or pencil
- Scissors
- Ruler

Before you start, here is a how-to YouTube tutorial: <https://youtu.be/FRtMipCgogk>

So, let's get started!

1. Make your cardboard kumihimo disc.

- Trace a circle onto a piece of cardboard. Cut out the circle, then cut 8 small slits evenly spaced around the edge. Each slit should be about ½ inch long.
- Use your pen or pencil to poke a hole through the center of the circle.

2. Make the starting knot.

- Line up the ends 7 strands of yarn and then tie a simple knot.
- Make it so that there is about 1 inch of loose ends from the top.

3. Put the yarn on the braiding disc.

- Push the knotted end of the yarn bundle through the hole in the center of the braiding disc.
- Put one piece of yarn into each slot, except the top slot.

4. Braid your friendship bracelet.

- Making the bracelet is simple. Learn the following two steps and repeat.
- Hold the disc so that the empty slot is facing to the right. Count 2 threads to the left. Un-clip the third yarn and clip it into the empty slot.
- Rotate the whole disc so that the empty slot is back facing to the right. Repeat the steps and watch the bracelet grow.

5. Remove your bracelet from the braiding disc.

- Once the bracelet is long enough to go around your wrist, un-clip it from the braiding disc.
- Tie an overhand knot right at the point where the braiding ends. Then you are done!

3 things to remember about Kumihimo:

1. The word kumihimo means “gathered thread”.
2. Braiding and threading silk has been used for centuries.
3. Kumihimo can be used for many things like jewelry, clothing, etc.
