LA COUNTY LIBRARY

Activity Idea

Coffee Filter Earth

Recommended for Ages 3 & up

You will need the following materials:

- Coffee Filters
- Washable markers
- Spray bottle filled with water
- Newspaper or Table Cover (optional)

Directions:

Here is a fun and easy Earth Day and springtime activity!

1. You probably should cover the surface you're working on with newspaper or table cover
2. Lay out the coffee filter flat.
3. Scribble on the filter with blue and green markers.
4. Spray the middle of the filter 2 or 3 times.
5. Watch the water spread out to the edges of the filter.

Let it dry and you should see a blend of blue and green just like our planet. For more fun, discover the colors of the other planets in our solar system. Maybe you can try making coffee filter versions of them too!
