Nature Collage

Recommended for Ages 6 - 9

Collage is assembling smaller pieces together to create a new whole piece of art. Here you can assemble a collage using small natural objects you find around your home.

You will need the following materials:

- Nature objects such as leaves, plants, flowers, rocks, or pebbles
- Yarn or other accessories
- Paper
- Glue

Instructions:

1. Collect your assortment of nature objects and sort them by type and shape.
2. Think of what type of collage you want to make. Put glue on a piece of paper and then place your nature object on top of the glue.
3. Add additional materials such as yarn to your collage.
4. Let your collage dry flat before picking it up or pieces will fall off. This will take a while.
